

**CM1817/4017**

**Quiet single disc machines with belt drive.**

**With 43 cm working width.**

**The CM17 DS version with double speed is also available.**

## CM1817/4017/17 DS Suitable for thorough, maintenance cleaning and polishing of synthetic and vinyl floors

Comac belt-driven single disc machines have a controlled weight distribution thanks to motor position so that good balance is achieved without

causing operator fatigue.

Thanks to their structure they are quiet, powerful, reliable and guarantee constant productivity.

## CM1817 Single brush machine with extremely spacious tank

Easy tanks release system for comfortable removal

Tank with resting supports to ensure balance and easy water filling

### 15 litre tank with ergonomic handle for easy transport close to a water outlet

The operator can adjust the handle at any of the preset levels for best operating posture

Disc head assembly made of 3 mm thick stamped steel with corrosion-resistant treatments: cataphoresis and epoxy powder painting

Steel plate for even weight distribution on the pad and for protection of the drive system (additional plate for greater pressure as optional equipment)

Strong, large size wheels for easy transport. Overcoming small obstacles (i.e. steps) is made easier

Decentralised motor for best machine balance

**The CM17 DS version with double speed is also available**
